## ABOUT PAPER MONEY

THE ORDER OF PRESENTATION OF PAPER MONEY VALUES IS BASED ON the standard reference book on U.S. paper money *Paper Money of the United States* by Arthur and Ira Friedberg, following the original work by Robert Friedberg.

The listings are categorized by type of currency — silver certificates, legal tender notes (also known as United States notes, depending on when a note was issued), Treasury notes, Federal Reserve notes and so on — and each type is a separate category.

Notes are then arranged in ascending order of denomination within each type, and by series within each denomination. The numbers (called Friedberg numbers) in the first column of each listing are the standard, universally accepted method of describing and cataloging United States paper money. The values are presented in the order they appear in the Friedberg book.
